

## **“The Chief’s Corner”**

**April 2016**

Jonesville has placed in service on each ETA, a standpipe kit which prepares us to perform standpipe operations, if needed, at the majority of highrise buildings within our response area. The likelihood of responding to one of the many hotels within our area has increased with the expanded building development throughout the town. Standpipe operations are also part of our training in Jonesville.

### **Our kit contains the following items:**

4 - 50’ lengths of 2 ½” hose (Denver load); 1 length with 1 1/8” smoothbore tip nozzle

1 - 2 ½” x 2 ½” standpipe inline pressure gauge (protective cap)

1 - 2 ½” x 2 ½” 60-degree elbow

2 - spanner wrenches

1 - 18” pipe wrench

1 - wire brush

1 - spare operating hand wheel

1 - 1 ½” x 2 ½” increaser

1 - spare smoothbore nozzle with 1 3/8” tip

3 - spare nozzle tips: 1”, 1 ¼”, 1 3/8”

1 - set of stacked tips: 1”, 1 1/8”, 1 ¼”

Firematically yours,

Patrick J. Champagne  
Chief – Jonesville Fire Department
